## PROJECTS

### Personal Portfolio — [[Live Link](#)]

Designed and developed a personal portfolio website using HTML, CSS, and JavaScript to showcase my skills, projects, and professional experience. Implemented a responsive and visually appealing deWeb Application sign to ensure optimal user experience across devices. Integrated dynamic elements with JavaScript to enhance interactivity, such as a project gallery and contact form. Demonstrated proficiency in front-end technologies and a keen eye for design, resulting in a polished and functional online presence.

### Weather Application — [[Live Link](#)]

Designed and implemented a dynamic weather application using HTML, CSS, and JavaScript to provide users with real-time weather information. Integrated with a weather API to fetch and display current weather conditions, forecasts, and temperature trends. The user-friendly interface allows users to search for weather details in different locations. This project showcases proficiency in front-end development, API integration, and a practical application of data visualization for an enhanced user experience.

### Personal Finance Calculator — [[Live link](#)]

Created a user-friendly web-based calculator using HTML, CSS, and JavaScript to help users manage their finances effortlessly. The calculator enables the easy tracking of monthly income, expenses, and calculates the remaining balance. Implemented a straightforward interface for a seamless user experience, allowing individuals to gain quick insights into their financial situation. This project showcases my ability to develop practical tools using front-end technologies..
